Career Objective

Aspiring full-stack developer and computer science student. I enjoy building useful applications. My goal is to use my skills in web development and AI to solve real problems, learn from real projects, and grow as a developer.

Technical Skills

Languages: C++, Java, JavaScript, Python
Frameworks/Libraries: React, MERN, Tailwind CSS, Node.js
Databases: MySQL, MongoDB, Supabase
Tools: Git/GitHub, Web Scraping, Automation Scripts

Projects

MovieHub – Link | Github
Movie search and watchlist platform with Popcorn Pilot, an AI-powered movie suggestion bot. Built with React and Supabase.

Simple Notes – Link | Github
AI-enabled note-taking app that generates summaries, quizzes, flashcards, and bullet points.

FIARY (AI Smart Diary) –Github
Personal smart diary/journal with features like daily entry, moments logging, financial tracker, and AI-powered self-review system. Runs locally for privacy.

Python Automations & Scripts
- Built automation tools for repetitive tasks (e.g., auto form-filler, web scraping, data extraction).

Experience & Contributions

- **Open Source**: Completed Hacktoberfest 2024, contributed to multiple repositories.
- **Hackathons**: Participated in 2 hackathons, explored innovative ideas in full-stack & AI.

Education

Scaler School of Technology (affiliated with BITS Pilani) – Bengaluru
B.Sc. (2024–2027) + M.Sc. (2027–2028) in Computer Science

Kendriya Vidyalaya Sanghatan – CBSE
Class 12 (Science): 88% (Class Topper)
Class 10: 93%

Soft Skills

Adaptability · Problem Solving · Teamwork · Creativity · Content Creation

Hobbies & Interests

Basketball · Badminton · Gym · Cooking · Journal Writing (FIARY project) · Content Creation · Video Editing
